

Urgent notification on facilitation of delivery of Phytosanitary Certificates in peculiar situation by COVID-19

Due to COVID-19 outbreak, global travel, transportation and trade are significantly affected which often causes of delay of arrival of Phytosanitary Certificates (PC) resulting in delay of clearance of imported consignments.

To facilitate trade of agricultural products, National Plant Protection Organization of Republic of Korea, the Animal and Plant Quarantine Agency (APQA) would like to ask that PC of agricultural products exporting to Rep. of Korea be delivered with the consignments (ex. attach PC securely inside container) or make sure PC can be delivered before arrival of the consignment. This would help timely clearance, especially for fresh fruits and vegetables.

We ask your understanding and cooperation.
