**Dear Mr. Mr. Harry Arijs**

Subject: Importing citrus fruits to the European Union

Considering that in the case of quarantine conditions for importing citrus fruits to the European Union, it is necessary to indicate in the phytosanitary certificate that the country/ region/ place of production is free from the fungi *Phyllosticta citricarpa* and *Pseudocercospora angolensis*, I would like to inform you that there is no report of the existence of these two species in Islamic Republic of Iran.

Sincerely

**K. Changalval**

**Director of**

**Plant Protection Organization**
