## **- A huge amount of certificates**

---

**Improving Efficiency  
Needed**

**Ensure the authenticity and accuracy  
to accelerate consignment clearance**

**Fraudulent certificates  
increased**

**Severely impact seriousness and  
authority, bring great harm to the  
healthy development of international  
trade**

## **- Countermeasures**

---

- In order to safeguard the international image of “Made in China” and maintain order for international trade, AQSIQ has always been committed to take effective measure to improve quality and efficiency of certificate issuance and to crack down upon fraudulent certificates.**

# - Crack down on counterfeiting certificates

- More counterfeit proof

The fundamental

solution ???

The fundamental

solution ???

# The fundamental solution

**Set up an international online electronic  
certificate verification mechanism**

# - China's International E-Cert Cooperation

The cooperation mechanism with other countries on electronic certification has been gradually established.

## **2. Features of China's E-cert system**

# - Features of the China's E-cert system

# - The Main Features

## Standardization

- Designed in accordance with international standards.
- Conforming to the UN/CEFACT E-cert Data Standard model
- Data transmitted in the extensible Markup Language (XML)

# - The Main Features

## Flexibility

- **3 flexible accesses:**

- On-line view and verification ( <http://ecert.eciq.cn> )
- Pull data (SOAP interface)
- Push data (SMTP interface)

# - The Main Features

## Openness

- No limit at number of users
- Apply for the approval from the competent department in AQSIQ through your embassy in China

# - The Main Features

## Timeliness

- Check e-cert information in real time
- Submit online inquiry
- Adopt measures according to verification results and reply immediately

### GENERAL INFORMATION

The purpose of this user's guide is to provide general information and instructions to foreign users regarding use of the CHINA INSPECTION AND QUARANTINE ELECTRONIC CERTIFICATE SYSTEM (China E-cert System).

### NOTE ON THE SYSTEM

For the purpose of promoting healthy development of trade in food and agricultural products as well as trade facilitation, the China Inspection and Quarantine Electronic Certificate System (China E-cert) was developed by AQSIQ, which has come into effect recently. The use of this system will also provide effective prevention to China Inspection and Quarantine (CIQ) certificates from illegal forgeries and alterations.

I. The China E-cert has opened to all your authorities from now. The text information regarding export Certificates officially issued by our local CIQ authorities after 1st January 2010 is currently available on the system for verifications.

Meanwhile, the function of *Export Cert Data Input* enables your authorities to input and send SPS certificate information of your export products as assistance for our border inspection and quarantine.

II. All users should first register when using this system. After the registration information is confirmed, you can use the system.

# 3. Current situation & achievement of China's E-cert international cooperation

# - Development & Achievements

-  A. Over 9 million E-certs uploaded
-  B. Over 40 countries using the system
-  C. Nearly 300 officials using the system
-  D. 5 million E-certs verified

# - Development & Achievements

## - Cooperative agreements signed

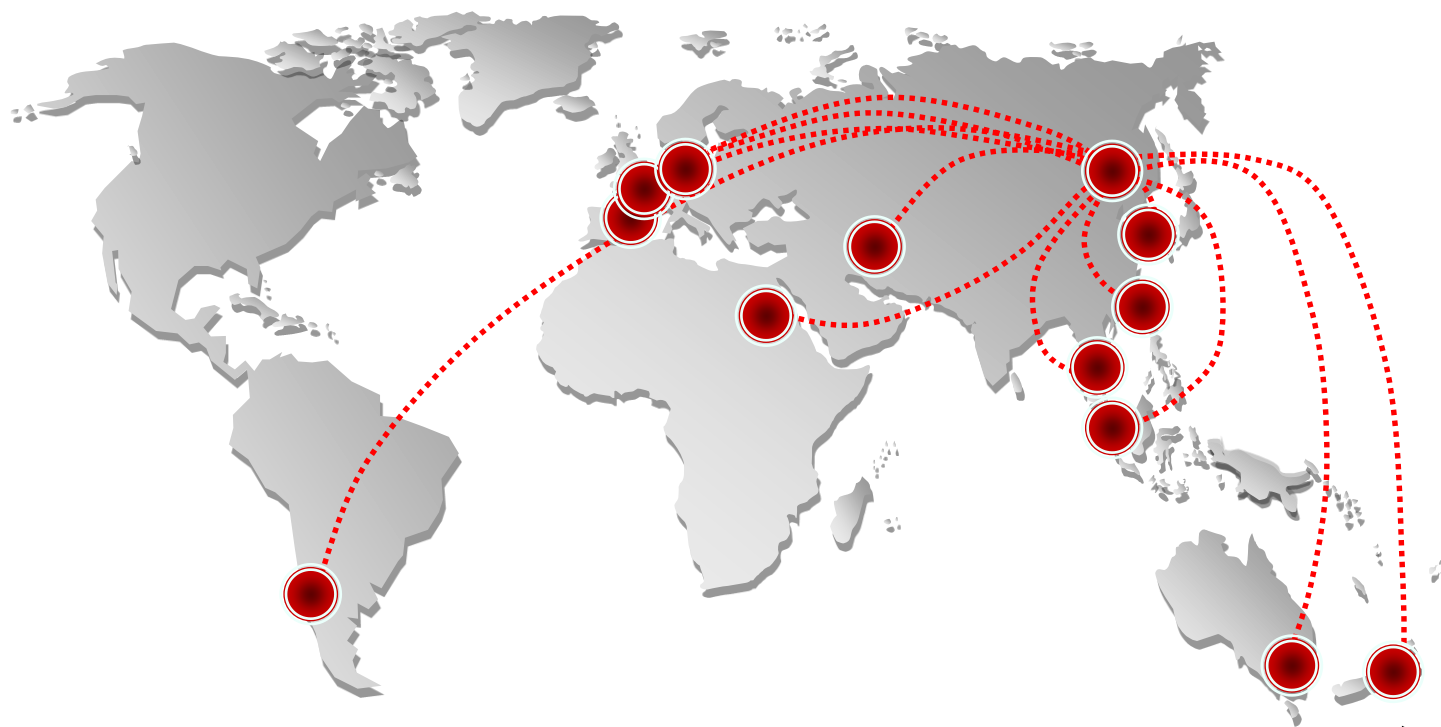

# - Countries or areas communicated

# 1. Accelerates import clearance

- E-Cert data exchange has greatly accelerated the delivering of certificates.

## 2. Prevents fraudulent certificates

- The use of HTTPS can effectively prevent electronic data from being tampered, and ensure the authenticity and accuracy of electronic certificates.

### 3. Establishes communication channel

- The E-cert System provides a good platform for online communication in real time.

## 4. China's future work on E-cert

# **- The old and new system switching**

---

- **CIQ2000 will be ended**
  - **ECIQ will be put into trial operation**
- After the new system fully implementing, we will issue certificates digitally and realize the exchanging data.**

# - The Prospects for the future

---

- **China is willing to cooperate with all countries in e-cert and set up mechanisms for e-cert verification. China welcomes all countries to use its E-cert system, so as to carry out e-cert verification, facilitate trade, promote paperless certification and ensure quality and safety of import and export commodities traded between China and other countries.**

# 1. To further improve the system

---

- **China will speed up adjustment of the E-cert system and development of E-cert system' sub-systems and supporting systems.**
- **China welcomes suggestions and comments on its E-cert system from all countries.**

## 2. To boost the development

---

- **China is willing to share experiences on e-cert with all countries and to help interested countries to establish their own e-cert systems.**
- **China is willing to conduct e-cert standards research, participate in formulation and revise of international e-cert standards, promote standardization of international e-certification, and constantly enhance the level of e-certification in China and in the world.**

### **3. To promote paperless certification**

---

- **China is willing to make joint efforts with its cooperative partners to gradually realize paperless certification between governments through on-line e-cert verification.**

### 3. To promote paperless certification

- China is willing to make joint efforts with its cooperative partners to gradually realize paperless certification between governments through on-line e-cert verification.

Thank you!
