International Plant
Protection Convention

Countries

The IPPC is an international treaty that applies to most nations involved with international trade in any commodity that could introduce a new plant pest into a new area; in other words, it is applicable to all trans-boundary movements of plants and plant products.

It is in the interest of all nations to be contracting parties to the Convention: membership means they can play an active part in developing international standards that help to protect their exported and imported goods.

Exchanging technical and official phytosanitary information is vital to the Convention's effective implementation. The IPPC Web site — the IPP — acts as a forum for information exchange, and parties and the IPPC Secretariat use it to meet IPPC reporting obligations by publishing documents or providing links to outside Web pages.

The Convention identifies certain types of information countries are required to report to other contracting parties, to the IPPC Secretariat and/or to RPPOs:

- [IPPC Official Contact Points](#) (Art. VIII.2)
- [Official pest report](#) (Art. VIII.1a)
- [Description of the NPPO](#) (Art. IV.4)
- [Phytosanitary Restrictions/Legislation](#) (Art. VII.2b)
- [Entry points](#) (Art. VII.2d)
- [List of regulated pests](#) (Art. VII.2i)
- [Emergency actions](#) (Art. VII.6)

The Convention identifies some other reporting that should be carried out on request. This is usually bilateral in nature, but this information can also be made available through the IPPC Web site:

- [Non-compliance](#) (Art. VII.2f)
- [Organizational arrangements of plant protection](#) (Art. IV.4)

National & Regional Summary Statistics

Information exchange under the IPPC The International Plant Protection Convention (1997) outlines that it is the responsibility of contracting parties to engage in the exchange of official phytosanitary information. The Convention clearly identifies phytosanitary information which contracting parties are obliged to report, and it also lists several optional reporting areas (National Reporting Obligations - NROs). The Commission on Phytosanitary Measures has established the International Phytosanitary Portal (IPP) as the primary forum for information exchange by Contracting Parties, Regional Plant Protection Organizations (RPPOs) and the IPPC Secretariat.

Tables that summarize NRO met through the IPP:

- Status of IPPC contacts points:
 - Status of IPPC Contact Points
 - Changes among IPPC Contact Points
 - Activity of IPPC Contact Points and IPP Editors on the IPPC
- Summary statistics for National Reporting Obligations: NROs since 2005
- Summary statistics for National Reporting Obligations: NROs in a particular year
- Summary of NRO year of Pest reports
- Summary of NRO year of Phytosanitary legislation
- NROs: Submission trends
- Detailed statistics for each NRO

Summary statistics for National Reporting Obligations

[Go back](#)

2005 - 2019

Select year for statistics:

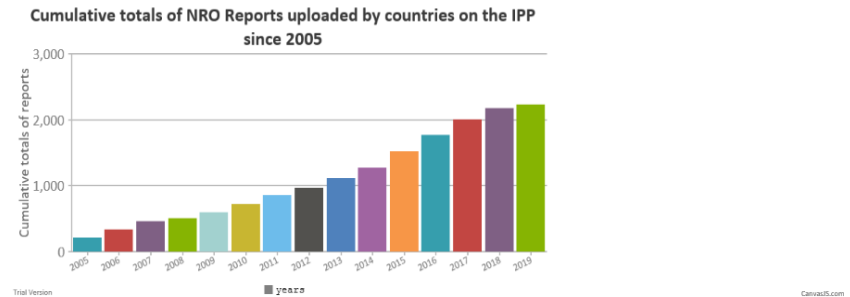

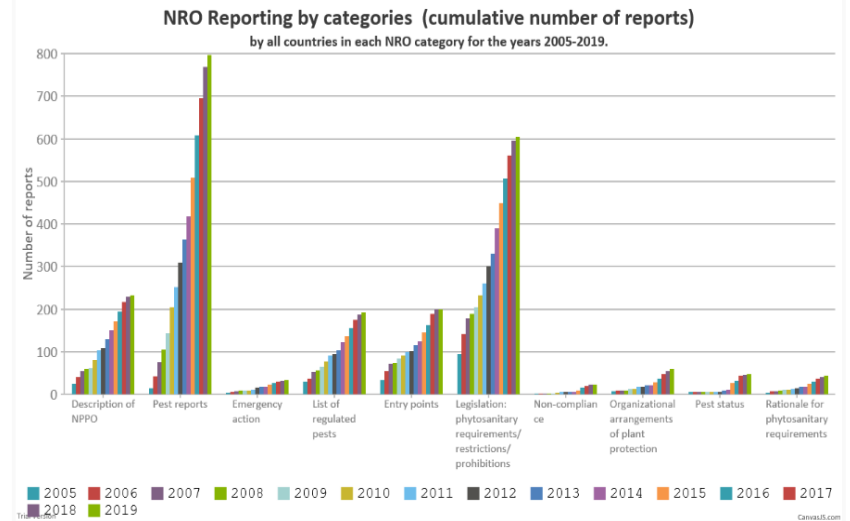

2019

While countries did start reporting in 2005, the level of reporting was relatively low. However, as more countries were trained in understanding their NROs and how to meeting NROs, so the cumulative number of reports made through the IPP has grown. Overall, the number of NRO reports, both considered as public or bilateral, made available by countries on the IPP has been steadily increasing for the last 14 years.

The cumulative total of NRO reports made available by all countries through the IPP in each NRO category for the years 2005- 2019.

Date generated: 09 Jul 2019, 14:07

Type of NRO	Reporting Year (cumulative totals)
