2. Project Scope and Relevance to the IPPC and main outputs (max 200 words)	
<p><i>The regional Project in FAORAP aims to strengthen phytosanitary capacity of NPPOs and technical supporting organizations/entities, e.g. universities, of Thailand and Viet Nam through activities such as the development of inspection manuals in native language, national/regional training courses for field inspection and laboratory testing methods, and the enhancement of public awareness for seed-borne/seed-transmitted disease risks to stakeholders such as seed producers, seed companies.</i></p> <p><i>Each NPPO has chosen some seed-transmitted diseases, e.g. Bacterial fruit blotch in Thailand, Tobacco mosaic virus in Viet Nam, based on the results of the initial research and discussions. The NPPO has implemented the national training workshops for the diseases existing in the country in collaboration with national universities due to the strengthening of the closer relationship. Regarding the diseases not occurring in both countries, the Project has organized the regional workshops in cooperation with other technical resources such as the NPPO of Japan.</i></p>
