This is because the draft ISPM on cut flower and foliage has already been circulated for the first consultation as well as the concept of commodity standard has not yet been concluded. So, it would be best to wait until we have a final conclusion. In addition, the term "plant in vitro (as a commodity)" is a group of commodities that may be able to develop a standard in which similar measures applied.

42	25	The term “commodity class” (2015-013) was added to the <i>List of topics for IPPC standards</i> by the Standards Committee (SC) in November 2015, because difficulties related to the understanding of its Glossary definition had been identified. The SC asked the Technical Panel for the Glossary (TPG) to review this term in light of the discussions on the concept of a commodity standard and commodity classes within the context of ePhyto and consider deletion.	C	<i>Category : EDITORIAL</i> (7) Botswana (15 Aug 2019 12:41 PM) it should be deleted
43	26	In December 2016, the TPG discussed the term “commodity class”. They felt that the definition for “commodity class” was not useful and that it might be suitable to delete it from the Glossary. The TPG agreed to analyse how the term had been used in standards and suggested that the various Glossary terms defining different commodity classes also be reviewed to determine if their definitions added value or rather created difficulties.	C	<i>Category : EDITORIAL</i> (8) Botswana (15 Aug 2019 12:42 PM) it should be deleted
44	27	In May 2017, the SC confirmed that the TPG should consider the term “commodity class” (2015-013) and its possible deletion. The SC removed the pending status of the term “cut flowers and branches (as a commodity class)” (2012-007) and added the following terms to the <i>List of topics for IPPC standards</i> : “bulbs and tubers (as a commodity class)” (2017-001), “fruits and vegetables (as a commodity class)” (2017-003), “grain (as a commodity class)” (2017-004), “plants in vitro (as a commodity class)” (2017-006), “seeds (as a commodity class)” (2017-007) and “wood (as a commodity class)” (2017-009).
