Para	Text	T	Comment
G	(General Comment)	C	<p><i>Category : SUBSTANTIVE</i> (6) New Zealand (2 Sep 2020 1:30 AM)</p> <p>1. New Zealand supports the adoption of this CPM Recommendation on this very important topic.</p> <p>2. Given the importance of the issue, New Zealand supports an concept ISPM to be developed in next Call for Topics, with annexes providing guidance to donors and NPPOs giving and receiving aids, and minimise the phytosanitary risks relating to food and aids during emergency situations.</p> <p>3. it is important to note that food and aids should meet the export and import requirements WHERE EXIST, especially for plant and plant products and other risk goods.</p> <p>4. It is important to note that where appropriate, obligation largely lays with the exporting NPPOs to ensure the aid provided to other countries are compliant with export requirements where exist, and exercise reasonable care that the goods are free from pests that could pose a risk to receiving countries.</p>
G	(General Comment)	C	<p><i>Category : SUBSTANTIVE</i> (5) China (1 Sep 2020 7:55 AM)</p>

			Suggest that animal diseases are described only in Background not Appendix. Animal diseases are not the responsibility of the IPPC community.
36	<i>use</i> the guidance available in adopted ISPMs (e.g. ISPM 32 (<i>Categorization of commodities according to their pest risk</i>)) along with the general guidance in Appendices 1, 2 and 3 to identify measures that could be applied to food and other aid to prevent the international movement of pests that may be associated with <u>them and guide relevant stakeholders(e.g. aid agencies, exporters, regulators) in implementing these measures</u>	P	<i>Category : SUBSTANTIVE</i> (1) China (1 Sep 2020 7:53 AM) Add a sentence at the end of the paragraph. Contracting parties and regional plant protection organizations should guide the implementation of specific measures.
38	<i>encourage</i> the pre-dispatch treatment, treatment during transit <u>by NPPOs of donor countries</u> or pre-clearance of food, other aid and personnel to expedite clearance	P	<i>Category : SUBSTANTIVE</i> (3) China (1 Sep 2020 7:54 AM) Treatment during transport is the responsibility of the NPPOs of donor countries.
38	<i>encourage</i> the pre-dispatch treatment, treatment during transit or pre-clearance <u>of food, other aid and personnel</u> to expedite clearance	P	<i>Category : SUBSTANTIVE</i> (2) China (1 Sep 2020 7:53 AM) Pre-clearance is widely used in import and export, not limited to food, other aid and personnel nowadays.
39	<i>establish</i> mechanisms for providing information to potential donors, aid agencies, importers and exporters to reduce the movement, in an emergency, of goods posing a pest risk. <u>(g) if regulated pests are found in food and other aid , the NPPO of receiving country can conduct treatment or return goods back, and notify NPPO of donor country along with the ISPM13.</u>	P	<i>Category : SUBSTANTIVE</i> (4) China (1 Sep 2020 7:55 AM) Add a paragraph as another suggestion. The treatment should be specified if any regulated pests are found.
230	Products are fit for purpose	C	<i>Category : SUBSTANTIVE</i> (8) Nepal (27 Sep 2020 7:39 AM) (is it permissible to provide expired processed food for consumption as an food aid?)
