

31 May 2022

## 2022 CRITERIA USED FOR PRIORITIZING PARTICIPANTS TO RECEIVE TRAVEL ASSISTANCE TO ATTEND MEETINGS ORGANIZED BY THE IPPC SECRETARIAT

- [1] The organization that employs an IPPC meeting participant is responsible for funding the travel and daily subsistence allowance for that person to be able to attend.
- [2] If the employer is unable to allocate sufficient funds, participants are first encouraged to seek assistance from sources other than the IPPC Secretariat. Where such demonstrated efforts to secure assistance have been unsuccessful, requests for travel financial assistance (i.e., travel and subsistence costs) from the IPPC Secretariat may be made. IPPC funds available to assist attendance at meetings are usually limited and if so the following priority for providing travel assistance will be followed.
- [3] It is expected that participants will attend all sessions of the meeting and those participants who plan to attend only part of a meeting should fund their own travel.

### 1. Funding Criteria

- [4] Priority for providing travel assistance will be given to participants:
- from countries with low Gross National Income (GNI) and low GNI per capita – criteria used to categorize national financial resources based on World Bank data as described in section 3 below
  - who request only partial travel assistance (e.g., government or organization provides airfare and only daily subsistence allowance (DSA) is requested)
  - who are the only participant from a country to a particular meeting
  - funding may be provided based on the need to establish a CPM quorum, subject to availability of funds
  - preference may be given to least developed countries
  - consideration will be given to ensuring balanced regional representation; and
  - only applications received by the specified deadline will be considered eligible.
- [5] Participants from non-contracting parties are given the lowest priority for assistance.
- [6] If the participant does not work for a National Plant Protection Organization (NPPO), it is assumed that their organization will provide assistance and the participant will be considered a lower priority for IPPC Secretariat assistance.

### 2. Commitment of Funded Participants

- [7] Funded IPPC meeting participants are subject to the following:
- a) Finalization of funding will be subject to each participant signing a Statement of Commitment (SoC) which will stipulate the attendance and participation requirements for that meeting. The requirements will vary dependent on the type of meeting and donor requirements.
  - b) Attendance and participation for funded participants in the meeting will be recorded and provided to the donor as appropriate.

- c) Funded participants who do not attend all sessions of the meeting identified in the Statement of Commitment, may be required to return portions of the DSA (or the total amount if there is no attendance) and future participants from the same county will be given a lowest priority for funding.

### 3. Methods used to assess financial resources of a country

[8] The Gross National Income Level and the size of the economy of the country in which a participant is employed will be used to help determine priority for and the level of assistance provided.

[9] The IPPC Secretariat uses two categories of economic information to determine which participants receive higher priority for assistance. The [World Bank data for Gross National Income](#)<sup>1</sup> (GNI) per capita (2022) is used to sort countries into general income levels (low, lower-middle, upper-middle, and high). In addition, the nations with the 28 largest economies of the world (as determined by <https://data.worldbank.org/indicator/NY.GDP.MKTP.CD>) receive lower priority for assistance. The combination of these two parameters helps determine a participant's priority to receive assistance and the amount of assistance provided.

- Participants from low and lower-middle income countries that are not among the 28 largest economies will have the highest priority to receive assistance for both airfare and a daily subsistence allowance (DSA).
- Participants from low and lower-middle income countries that are among the top 28 economies and participants from upper-middle income countries that are not among the 28 largest economies will have a high priority to receive assistance for airfare only.
- Participants from upper-middle income countries that are among the 28 largest economies will have a low priority for any assistance.
- Participants from high income countries will have the lowest priority for assistance

[10] The World Bank financial category for the participants' country will be set for each participant at the date they sign the IPPC statement of commitment (SOC), and this assessment will be applied for the full term of their membership. This financial assessment will be reviewed using the latest World Bank categorization on re-election or nomination.

[11] If financial situations change substantially, participants may request temporary exceptions.

### 4. Exceptional Considerations

[12] Depending on the type of meeting, other exceptional considerations may be used for prioritization of participants to receive assistance.

[13] For example, higher priority for funding may be given to participants for specific meetings:

- to ensure participation of members or individuals with required expertise
- who cannot fund themselves due to their involvement in more than two IPPC meetings per year (excluding the CPM)
- to ensure broad geographical participation, or at meetings where the Food and Agriculture Organization (FAO) regions are represented, to help ensure all FAO regions are represented e.g., CPM Bureau and governance meetings.

***\*In all cases the final determination of which participants will receive assistance, and at which level, is established by the IPPC Secretariat. Exceptions are at the discretion of the IPPC Secretariat.***
