The Implementation and Capacity Development Projects submitted by partners

Call for Implementation and Capacity Development projects

- The **call for ICD projects** issued on 1 February and closed on 25 March
- **24 projects** submitted from nine organizations
- The IC Team on Projects selected **eight projects** to be presented during the IC meeting open session on ICD projects on 11 April

How submitted projects will contribute to the IPPC Community?

- The submitted projects will be posted to the [Implementation and Capacity Development Projects](#) of the IPPC website (IPP)
- The project supporting materials indicated in the project report form will be reviewed to be posted to the IPP as [Contributed Resources](#) by the IC Team on Contributed Resources
- The posted resources will be linked to the [Phytosanitary System component page](#) by classifying related component (e.g. Surveillance, Pest Risk Analysis, Diagnostics)

Implementation & Capacity Development

Contracting parties to the IPPC agree to promote the provision of technical assistance to other contracting parties with the objective of facilitating the implementation of the Convention. In particular, the [Committee](#) encourages support to developing countries in order to improve the effectiveness of their [National Plant Protection Organizations \(NPPOs\)](#) and increase the potential for them to realize the benefits of safe trade. The Convention also encourages participation in regional plant protection organizations as the basis for cooperation in achieving the aims of the IPPC at the regional level.

The Implementation and Capacity Development Committee (IC)

Contributed Resources

What are Contributed resources?

Contributed resources are phytosanitary technical resources that were developed by National Plant Protection Organizations (NPPOs), Regional Plant Protection Organizations (RPPOs) and other organizations for their own use and kindly provided the IPPC Secretariat as they are considered useful for other organizations too.

The IPPC Guides and Standards for Phytosanitary Measures (ISPMs), CPM Recommendations, IPPC Guides and training materials, as well as Contributed resources.

Phytosanitary System

The essential components of a Phytosanitary System are identified below and each component page brings together all of the relevant technical resources to help National Plant Protection Organization (NPPO) staff understand and access information related to a subject. Relevant technical resources include: [International Standards for Phytosanitary Measures \(ISPMs\)](#), [CPM Recommendations](#), [IPPC Guides and training materials](#), as well as [Contributed resources](#).

This page has been developed in cooperation with members of the [Implementation and Capacity Development Committee \(IC\)](#).
