What are IPPC Guides and training materials?

Guides and training materials (e-learning courses, guidelines, training kits, curricula and other technical resources) aimed at enhancing phytosanitary capacity

Tools aimed to help NPPOs to effectively implement the:

- International Plant Protection Convention (IPPC),
- International Standards for Phytosanitary Measures (ISPMs), and
- Recommendations of the Commission on Phytosanitary Measures (CPM).

They are developed under the oversight of the Implementation and Capacity Development Committee (IC)

IPPC guides and training materials

IPPC Guides and Training Materials
 IPPC Guides and training materials are intended to help NPPOs build capacity and effectively implement the International Plant Protection Convention (IPPC), the International Standards for Phytosanitary Measures (ISPMs) and recommendations of the Commission on Phytosanitary Measures (CPM). They suggest best practices and provide a starting point for developing legislation, policies and procedures that are responsive to national phytosanitary needs and priorities.

Translation of resources
 Ensuring that all IPPC guides and training material are available in all FAO languages is a priority of both the Implementation and Capacity Development Committee and the IPPC Secretariat. Translating them

Title	Type	EN	FR	ES	AR	ZH	RU	Year

Guide to regulation of wood packaging material (published in 2023)

Published with technical support from **NPPO of Canada**

- ✓ improve understanding of the phytosanitary requirements for the movement of wood packaging material in international trade
- ✓ provides practical guidance to help NPPOs apply the phytosanitary measures approved in ISPM 15 (Regulation of wood packaging material in international trade)
- ✓ includes case studies that highlight how different countries have addressed some of the challenges associated with implementing ISPM 15
- ❖ **ISPM 15 treatment manuals on fumigation and heat treatments are coming soon!**

Emergency Preparedness: A guide for developing contingency plans for outbreaks of quarantine pests (published in 2023)

Published with financial support from **European Union and Common Market for Eastern and Southern Africa (COMESA)**

- ✓ outlines the main components of both generic and pest-specific contingency plans
 - ✓ provides guidance on how NPPOs can effectively organize and allocate resources to eradicate or contain pest outbreaks
 - ✓ discusses criteria for establishing and maintaining pest freedom, pest reporting and includes several country case studies
- ❖ Spanish translation is under development

Prevention, preparedness and response guidelines for **Fusarium Tropical Race 4 (TR4) of banana (published in 2023)**

Published with financial support from **European Union and Common Market for Eastern and Southern Africa (COMESA)**

- ✓ focuses on emergency preparedness and preventing the introduction and spread of Fusarium TR4
- ✓ provides relevant biological and scientific information that should be considered when developing a response plan
- ✓ includes elements relevant to pest risk analysis, implementing phytosanitary measures, official diagnostics and surveillance
- ❖ **French translation is under development**

E-learning courses (published in 2022)

- ✓ **Four e-learning courses** were published in 2022 with financial support from **European Union and Common Market for Eastern and Southern Africa (COMESA)**
- ✓ **Certificates or badges** are issued immediately to trainees that successfully complete the course and test.

E-learning courses (published in 2022)

1. Pest Risk Analysis (PRA)

- explains the international context for Pest Risk Analysis (PRA) and outlines the pertinent international standards and resources available for pest risk assessment, pest risk management and pest risk communication
- provides knowledge to understand the purpose of PRA
- helps to develop the skills required to conduct PRAs within the context of the IPPC framework
- consists of two levels of modules; Intermediate level and Advanced level.

Convention

E-learning courses (cont.)

2. Phytosanitary Export Certification System

- offers lessons on the activities of the phytosanitary export certification process
- targets key roles of export certification including:
 - Industry
 - plant and plant products producers and exporters
 - NPPOs
 - export inspectors and export supervisors

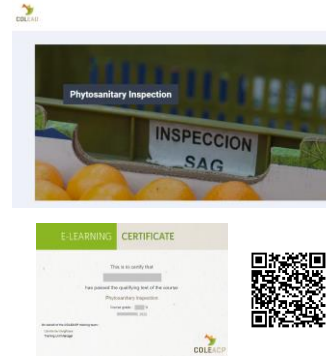

E-learning courses (cont.)

3. Phytosanitary Inspection

- introduces key concepts on:
 - phytosanitary inspection and plant pests
 - import verification systems and
 - methodologies for sampling consignments
- provides practical guidance to assist NPPOs and authorised inspection personnel in conducting an inspection for specific commodities, such as:
 - cut flowers
 - live plants, tubers and bulbs
 - seeds, nuts and grains
 - Woods and dry plant material

E-learning courses (cont.)

4. Surveillance and reporting obligations

- targets NPPD managers, supervisors, and staff involved in surveillance and pest reporting
- reporting obligations module is particularly relevant to IPPC official contact points and national editors of the country page on the International Phytosanitary Portal (IPP)
- provides guidance
 - related to **ISPM 6 (Surveillance)**, **ISPM 8 (Determination of pest status in an area)** and **ISPM 17 (Pest reporting)**;
 - how to strengthen national surveillance systems and activities of pest monitoring and detection; and
 - how to determine pest status and comply with IPPC obligations for pest reporting.

Translations of the guide

To develop translated guides, we need:

- donors for translation
- in-kind translators
- experts to proofread translated guides

If you are interested in collaborating,

Webinar on new IPPC guides and e-learning courses (October 2023)

- Webinar on new IPPC guides and e-learning courses will be held in **October 2023**
- Target audience: **NPPO and RPPO staff members, and others within the phytosanitary community**
- Objective:
 - **Raise awareness of the new IPPC guides and e-learning courses**
 - **Increase the usage of the new IPPC guides and e-learning courses**
 - **Encourage active participation in the development of future products**
