- Appendix 3: Documents list..... 13

1. Opening of the meeting

1.1 Welcome by the IPPC Secretariat

- [1] The chairperson of the Commission on Phytosanitary Measures (CPM) Focus Group on Climate Change and Phytosanitary Issues (FG-CCPI) opened the meeting and welcomed all the participants.

2. Meeting arrangements

2.1 Selection of the rapporteur

- [2] The focus group selected Glenn FOWLER (United States of America) as rapporteur of the meeting.

2.2 Adoption of the agenda

- [3] The focus group members adopted the agenda as presented in Appendix 1 to the present report.

3. Administrative matters

- [4] The focus group noted the absence of Samuel BISHOP (CPM Bureau “champion” for the focus group), Victoria LAMB (New Zealand), Ngatoko NGATOKO (Cook Islands) and Hannah SERWAA AKOTO NUAMAH (Ghana). The list of participants is presented as Appendix 2.

- [5] The list of documents had been circulated and is attached to this report as Appendix 3.

4. Updates from members of the focus group

- [6] Members of the focus group gave regional updates of relevance to the focus group.

- [7] The focus group member from **Latin America and the Caribbean** reported on the recent floods in Brazil, which have claimed at least 150 lives, left more than 600 000 people homeless and affected over two million people.¹ The record-breaking rainfall, the likes of which had not been seen since 1941, has wreaked havoc in the southern state of Rio Grande do Sul, destroying the municipalities located along the rivers. She added that a flood defence system similar to Amsterdam Rainproof was in place but it failed because of the sheer scale of rainfall.

- [8] **North America.** One focus group member from that region reminded the group that last summer there had been record-breaking wildfires in western Canada and, as a result, the government has been investing more in firefighters, who have been practising prescribed burns, forest spinning and the Indigenous People’s cultural burning practices.

- [9] The focus group member gave an update on what might be considered range-shifting species that are regulated by the Canadian Food Inspection Agency (CFIA), species that are found further south but are moving north, such as kudzu (*Pueraria montana*), whose presence in the Lake Erie area has been attested since 2009, the Japanese stiltgrass (*Microstegium vimineum*), which was discovered in a provincial park in 2019, or the spotted lanternfly (*Lycorma delicatula*), which is already present in the United States and making its way to Canada. She explained the ongoing efforts being made to prevent their spread and to eradicate these as well as other invasive species.

- [10] Another focus group member noted that their agency’s management would like to clear the presentation the focus group member will be giving on the FG-CCPI technical resource on climate change impacts on plant pests for one of the global level webinars in September 2024. The focus group member proposed

¹ <https://www.brasildefato.com.br/2024/05/21/death-toll-due-to-flooding-in-rio-grande-do-sul-rises-to-161-and-first-leptospirosis-fatal-victim-confirmed>

creating a draft presentation for the focus group's review and possibly doing a practice run for the focus group before submitting the presentation to their agency's management for clearance.

- [11] **Europe.** Another focus group member informed the group that he had attended the third meeting of the European Food Safety Authority (EFSA) Plant Pest Surveillance Network at which statistically based surveillance planning was discussed. The group member reported that EFSA had released a forest condition survey for 2023, which revealed the poor condition of German forests: only one of the main tree species (spruce, pine, beech and oak) are healthy.² He added that unprecedented flood levels have also been a concern in southern Germany and, although not comparable to those in Brazil, the recent floods have also claimed victims.³
- [12] The chairperson reported on a one-page paper that he had been invited to write on the theme of extreme weather conditions, illustrated by a dramatic ice storm that occurred ten years ago in Slovenia, damaging a lot of trees.⁴ The secretariat suggested that the paper could also be posted on the IPPC website, but the chairperson thought the article was too limited in scope to be of interest to the website's readership.

5. CPM-18 feedback on the technical resource and outstanding editorial comments to be addressed

- [13] The IPPC Secretariat (hereafter referred to as "the secretariat") informed the focus group that a draft of the technical resource on *Climate-change impacts on plant pests* edited by Karen ROUEN was presented at CPM-18 in April and approved by the Commission. The secretariat thanked Erika MANGILI ANDRÉ (Brazil) for coming to Rome to present the focus group's work at the CPM-18 plenary and noted the enthusiastic response and positive feedback that her presentation met with.
- [14] The secretariat reported that the United Kingdom of Great Britain and Northern Ireland pledged GBP 25 000 while Ireland set aside EUR 30 000 to support further work in this area. The secretariat congratulated the focus group on these additional financial contributions, recognizing the importance of the FG-CCPI's work on the impacts of climate change on pests.
- [15] Regarding the *Feedback from CPM-18* included in the "Background documents" of Appendix 3, the secretariat drew the focus group's attention to the fact that "the CPM noted a suggestion that data collected and prepared be posted centrally and an action plan for 2026–2030 be developed" and that "the CPM also noted a recent special issue of the *EPPO Bulletin* on the impact of climate change on plant pests".
- [16] In response to the secretariat's query, the chairperson confirmed that the latter can now be published on the IPPC website, while noting that signing all the copyright forms for the journal in question has been an ongoing task. As the document has recently become open source, all the members of the focus group will need to sign a new permission form, which the chairperson will send around.
- [17] One group member asked whether the aforementioned need to develop an action plan for 2026–2030 meant that the FG-CCPI's mandate had been extended until 2030. The chairperson clarified that it was only extended until CPM-20 (2026) in the first instance but that there was an interest in the focus group carrying on its activities until the end of the 2030 IPPC Strategic Framework. Another group member suggested that developing a five-year action plan for 2026–2030 could be something for the group to work on during the meeting in Brazil.
- [18] The focus group discussed the editorial comments and points yet to be addressed to finalize the draft of the technical resource document. These included proposed changes to the wording of the document in

² <https://www.bmel.de/SharedDocs/Pressemitteilungen/DE/2024/043-waldzustandserhebung.html>

³ <https://www.hochwasserzentralen.de> and <https://www.hochwasserzentralen.de/warnungen>

⁴ <https://defraenvironment.blog.gov.uk/2024/05/07/national-plant-health-week-extreme-weather-and-plant-pests>

line with the revised definition of “surveillance” in the amendments to ISPM 5 adopted at CPM-18;⁵ the suggestion to draft text boxes explaining the meaning of shared socioeconomic pathways (SSPs) and representative concentration pathways (RCPs); and the matter of missing or extra references in the Bibliography section.

[19] The secretariat explained that the technical resource document would come in two formats: a pdf version developed by an in-house graphic designer and a web version that a web developer from the Office of Corporate Communications (OCC) will produce; the two will be working together closely. As regards the timing, the secretariat said that ideally the document would be ready for publication before the summer break.

[20] The CPM Focus Group on Climate Change and Phytosanitary Issues:

- (1) *noted* the update on feedback from the CPM-18 regarding the FG-CCPI’s work;
- (2) *agreed* to respond to the editorial comments of the technical resource document within a week of the present meeting (i.e. 14 June);
- (3) *agreed* to draft the text boxes explaining in more detail what the shared socioeconomic pathways (SSPs) and the representative concentration pathways (RCPs) were; and
- (4) *agreed* to reread the clean version of the finalized document one last time before it was sent off to the designer.

6. Updates on possible digital report format of the technical resource

[21] The secretariat presented the proposal put together by the OCC team, consisting of a breakdown of the costs, a list of the actors involved (a designer, a digital publishing coordinator, web developers for template development and data entry, an English editor for the blurbs), and giving some examples of previously published digital reports (Appendix 3, under “Background documents”).

[22] The secretariat noted that the tentative timeline proposed by OCC would need to be revised, but that they were still aiming for an online release in August, followed by a launch in September on the IPPC website and on social media. The secretariat suggested that one of the focus group members could volunteer to write a blog for the IPPC webpage and said that the IPPC website would also publish a news article, quoting some of the members.

[23] One group member enquired whether the digital version of the publication would be featured on the FG-CCPI homepage or on the IPPC webpage. In reply, the secretariat explained that the technical resource, once it is published, will be posted on the [Environment & climate change page](#) as well as on the focus-group’s [landing page](#).

[24] The CPM Focus Group on Climate Change and Phytosanitary Issues:

- (5) *agreed* to discuss the blog suggestion at the next meeting.

7. Updates on planned webinars

[25] The chairperson reported on the progress that had been made as regards the arrangements for the series of online *Climate change and phytosanitary measures global webinars*, which have been updated as follows:

Seminar 1: Climate change, plants and pests

Proposed date and time: 24 September 2024; 10.00 CET (UTC +1)

Facilitator (5 min): Dominic

⁵ https://assets.ippc.int/static/media/files/publication/en/2024/02/1994-001_Draft_2022_Amendments_to_ISPM5_en_eq37uxg.pdf

| Talk title | Potential speakers / organization | Mins | Panel member contacting speaker | Contacted / agreed to speak |
|---|--|------|---------------------------------|-----------------------------|
| Current understanding of climate change science | Debbie Hemming, UK Met Office | 10 | Dominic | agreed |
| Horizon scanning | Mark Kenis, CABI | 15 | Hannah | agreed |
| Climate impacts on pests | Sandra Skendžić, University of Zagreb, Croatia | 15 | Dominic | agreed |
| Case study – climate change in the Pacific | Ngatoko Ngatoko, Cook Islands | 12 | | agreed |

Seminar 2: Risk assessment

Proposed date and time: 25 September 2024; 15.00 CET (UTC +1)

Facilitator: Karen

| Talk title | Potential speakers / organization | Mins | Panel member contacting speaker | Contacted / agreed to speak |
|---|---|------|---------------------------------|-----------------------------|
| Climate data and climate models for plant pests | Chris Randle, Sam Houston State University, USA | 13 | Glenn | agreed |
| Pest risk assessment | Ghana NPPO or university | 13 | Hannah | |
| Climate impacts on plants and pests in tropical areas | Francislene Angelotti Embrapa, Brazil | 13 | Erika | agreed |
| Climate change “guide” | Glenn Fowler, USA | 13 | | agreed |

Seminar 3: Pathways and risk management

Proposed date and time: 26 September 2024, 10.00 CET (UTC +1)

Facilitator: to be determined

| Talk title | Potential speakers / organization | mins | Panel member contacting speaker | Contacted / agreed to speak |
|---|--|------|---------------------------------|-----------------------------|
| Pest reporting, surveillance and monitoring | Mr. Sybren Vos, EFSA Sybren.Vos@efsa.europa.eu European Food Safety Agency (EFSA) https://www.ippc.int/en/partners/organizations-page-in-ipp/efsa/ | 13 | Bastian | agreed |
| Climate change and pest management | Sonja Gvozdenac, Institute of Field and Vegetable Crops, Serbia | 13 | Dominic | agreed |

| | | | | |
|---|-------------------------------|----|----------|-----------|
| International co-operation and POARS | Eunice Ringera, KEPHIS, Kenya | 13 | Dominic | agreed |
| Culturally significant plant species and Indigenous Peoples | Speaker from NZ | 13 | Victoria | contacted |

- [26] The chairperson pointed out that, despite a somewhat European focus, the aim of having as broad a geographical spread as possible had been achieved with invited speakers from Brazil, the Cook Islands, the United States, and potentially Ghana, Kenya and New Zealand.
- [27] One member raised a question regarding the target audience for the webinar series, and whether it was geared at decision makers, scientists or the general public. The secretariat confirmed that the series is aimed at a broader and mixed audience, but pointed out that when one invites high-profile figures, the expectation is that they will deliver a speech or opening remarks. One focus group member said that, based on their experience, NPPOs, RPPOs and researchers were more likely to attend than the general public or farmers, say.
- [28] As far as the duration of the webinars went, the chairperson said that, on reflection, one hour of talks followed by a 15-minute-long Q&A might be preferable to an hour-long session, as it would make things more relaxed and allow for an interactive session after the presentations. The secretariat pointed out that participants usually leave when the presentation takes longer than an hour, but the chairperson and focus group members thought that those who wished to stay on for the discussion would do so.
- [29] The chairperson raised a query regarding the templates and whether everyone would use IPPC templates. The secretariat said that in the past they had encouraged speakers to use those.
- [30] The secretariat explained that, as the host of the webinar series, the IPPC Secretariat would send out formal invitations to speakers – the earlier, the better – along with request for their profile, photo, any handles they use, in a bid to create buzz around the webinars that would act as a draw for participants. The secretariat would create a page for the webinar series, which would be advertised on social media, the IPPC announcements and FAO-wide as well as Plant Protection and Production Division (NSP) and Office of Climate Change, Biodiversity and Environment (OCB) networks.
- [31] The CPM Focus Group on Climate Change and Phytosanitary Issues:
- (6) *agreed* that each webinar would be 75-minutes-long and that an interactive Q&A session lasting 15 minutes would follow the four presentations;
 - (7) *requested* that the secretariat send the IPPC templates around so that the focus group could share them with the invited speakers; and
 - (8) *agreed* to update the webinar document to include the full name, title, organization and contact email, for the secretariat to use for contacting speakers.

8. Face-to-face meeting of the group in Brazil

- [32] The focus group discussed arrangements for their face-to-face meeting in Manaus, Brazil.
- [33] The focus group member from Latin America and the Caribbean (Brazil) reported that she had contacted a colleague from the Ministry of Agriculture and Livestock who is helping her to organize the meeting, and shared with the focus group the proposal for the meeting to be held in the hotel where they will be staying; a room will be rented with the necessary equipment to hold a video conference, so as to include those focus group members who will not be able to attend the meeting in person. She added that the plan was to schedule the technical visit for the last day of the meeting, so as not to have to rent the meeting room for the whole week.

- [34] The same group member also enquired whether the IPPC Secretariat could issue an official invitation to each of the focus group members at this stage, and explained that such an invitation could also prove useful in the hotel selection process. The secretariat said that they would need a brief description of the meeting's main objectives, its exact dates and location in order to draft the invitation.
- [35] Regarding possible activities that the focus group could engage in during their face-to-face meeting in Brazil, the chairperson shared with the focus group some notes briefly outlining the ideas put forward at the close of the last focus group meeting, namely a practical guide for climate change and Pest Risk Analysis (PRA) that NPPOs could use; a guide to help extension work; creating links with the Convention on Biological Diversity (CBD), the Centre for Agriculture and Bioscience International (CABI) and the Intergovernmental Panel on Climate Change (IPCC), which might involve representatives of these organizations joining in by video earlier in the week to give the focus group ideas to discuss for the rest of the week; and something to do with the Indigenous People's agriculture and island communities that the focus group members from the Southwest Pacific would take a lead on.
- [36] The chairperson suggested that these proposed activities could be placed higher up on the agenda for the next meeting so as to spend more time discussing them.
- [37] The secretariat suggested that the meeting in Brazil could also be used to develop possible content for the IPPC website or the climate change page.
- [38] The group member from Latin America and the Caribbean informed the focus group that she had received a request from someone in Colombia who wanted to take part in the meeting in Brazil, but she said that she needed to discuss this matter with the IPPC Secretariat since she did not know whether external participants were allowed. The secretariat suggested that there could be a guest session, bringing in other stakeholders and their points of view, thus allowing the focus group to gauge how its work fits in with that of the wider plant health community.
- [39] The CPM Focus Group on Climate Change and Phytosanitary Issues:
- (9) *agreed* to draft a description of the main objectives of the meeting in Brazil, along with its exact dates and location; and
 - (10) *agreed* that the discussion of ideas for an action plan extended until 2026 be moved up on the agenda for the forthcoming focus group meeting.

9. Any other business

- [40] The secretariat informed the focus group that the CPM Bureau will be meeting in the week starting 17 June and that the approval of the two nominees for the FG-CCPI's Asia representative had been added to their agenda. The FAO Office of Climate Change and Biodiversity (OCB) had put forward a nominee, following the request made by the FG-CCPI in its December 2023 meeting to invite a FAO OCB representative to join the group, who has already submitted all her credentials. The secretariat expressed the hope that by the time the focus group met next in July, both candidates will be onboard.

10. Date and arrangement of the next meeting

- [41] The focus group agreed to hold their next meeting in virtual mode on 9 July 2024 from 22.00 to 24.00 CET (UTC +1).

11. Close of the meeting

- [42] The chairperson thanked the participants for their contributions and closed the meeting.
