### DRAFT SPECIFICATION FOR ISPM: [Title of ISPM] ([Topic no.])

Specifications are the first stage in the process of preparing the text of a new standard. The content of the specification in its draft and approved format changes only very little. This template shows what a specification should include.

Specifications are commented on in the OCS and paragraph numbering is provided via the OCS.

### Status box

“Status box” is changed to “Publication history” after approval of the specification and the content rewritten according to established style.

This is not an official part of the specification and it will be modified by the IPPC Secretariat after approval

**Title**

[1] [Full title].

**[Reason for the standard] [Reason for the revision of the standard] [Reason for the annex to the standard]**

[2] This provides the justification as to why the standard is needed; some of this may be copied from the topics submission form.

**Scope**

[3] This provides the boundaries or limits to what the standard should cover.

**Purpose**

[4] Explain what issue will be addressed and/or harmonized once this standard is put in place.

**Tasks**

[5] This is a list of the expert drafting group's specific needs, activities (e.g. consider, identify, describe, review, revise) and expectations.

[6] The two penultimate tasks must be added to all specifications, and the last one only in case of revision to an ISPM.

[7] The expert drafting group (EDG) should undertake the following tasks:

(1) [Add text]

(2) [Add text]

(3) [Add text]

(4) [Add text]

(5) [Add text]

(6) [Add text]

(7) Consider whether the ISPM could affect in a specific way (positively or negatively) the protection of biodiversity and the environment. If this is the case, the impact should be identified, addressed and clarified in the draft ISPM.

See the IPPC Style Guide, section 2.1, "Guidance for expert drafting groups on the task pertaining to biodiversity and the environment".

(8) Consider implementation of the standard by contracting parties and identify potential operational and technical implementation issues. Provide information and possible recommendations on these issues to the Standards Committee (SC).

(9) **[For revision of ISPM only]** Review all references to the ISPM under revision in other ISPMs to ensure that they are still relevant and propose consequential changes if necessary.

**Provision of resources**

[8] Funding for the meeting may be provided from sources other than the regular programme of the IPPC (FAO). As recommended by ICPM-2 (1999), whenever possible, those participating in standard setting activities voluntarily fund their travel and subsistence to attend meetings. Participants may request financial assistance, with the understanding that resources are limited and the priority for financial assistance is given to developing country participants. Please refer to the *Criteria used for prioritizing participants to receive travel assistance to attend meetings organized by the IPPC Secretariat* posted on the International Phytosanitary Portal (IPP) (see <https://www.ippc.int/en/core-activities/>).

- [15] [C] Details of the technical panel membership may be found on the IPP: [Hyperlink to relevant TP top page]. Panel members are selected by the SC for a five-year term (or until the current pending work is completed, whichever comes first [for TPFF and TPFQ]). The SC reviews the composition of the panel on a regular basis. The SC may renew individual memberships for additional terms.
