

## Preliminary Information Data Sheet (PIDS)

<Scientific name of pest>—<date of report>

<New pest record in Australia; Extension of pest geographical range; Extension of pest host range; or Extension of pest geographical and host range >

PIDS Ref No: <CCEPP Secretariat to add>

### Summary

<Brief outline of detection and current situation>.

Further information attached: Yes  No

### Contact details

Contact: <name>, <department>, <state> Email: <email address>

Phone: <area code> <number> Fax: <area code> <number>

### Suspect pest details

Common name: <even if tentatively known>

Scientific name: <even if tentatively known>

### Detection details

Date of detection:

Pest reported by: <role of person reporting the pest>

Pest detected through: general surveillance  specific survey  other

Further details or comments:

<Details of how the pest was first detected and information on how far the pest has or may have spread>.

### Pest diagnosis

Laboratory: <name of laboratory undertaking the diagnosis>

– Laboratory accredited for the diagnostic test? Yes  No  Unsure

Diagnostic Protocol: <name of protocol used for the diagnosis>

– Is it an endorsed National Diagnostic Protocol? Yes  No  Unsure

Collection specimen lodged with: <name of herbarium/collection>

Collection Accession Number(s): <insert accession number(s)>

Available to upload to the Australian Plant Pest Database (APPD)? Yes  No

Further details or comments:

<Further information on pest diagnosis, including if preliminary or definitive diagnosis and the level of confidence in the diagnosis>.

---

### Host plant details

**Host name:** <scientific name, common name and variety>

**Host plant age:** <age or age range in days, weeks, months or years>

**Development stage:** <seed, seedling, young plant, mature plant, flowering, fruiting, senescent>

---

### Known or suspected hosts and distribution

<Details>.

---

### Occurrence and spread within Australia

<Details>.

---

### Site details

**Land use:** <pasture, broad acre crop, orchard, home garden, native vegetation area, port, suburban area, plantation, public garden or park>.

**Ownership:** <private, public – national park, public – state forest, public - other, unknown>.

**Location:** <address, nearest town, property name, district>

**Map coordinates:** <map name, scale and coordinates; latitude and longitude using WGS84 unless otherwise stated>

**Host plant location:** <additional information to assist in locating the plant or site>

---

### Damage

**Symptoms:** <e.g. discolouration, spotting, distortion of plant parts, feeding damage, etc.>

**Part of host affected:** <e.g. roots, trunk, stem, foliage, flower, fruit, etc.>

**Incidence:** <percentage of plants affected>

**Severity:** <percentage of individual plant affected>

---

### Response

**Course of action:** <action taken to diagnose, survey or contain pest>

**Trace back/trace forward:** <detail any movement of material that could have introduced or spread the pest>

**Photographs:** Attached  Unavailable

---

### Background (to be completed by CCEPP Secretariat)

**EPP Category (Schedule 13, EPPRD):** <Category 1, Category 2, Category 3, Category 4, Uncategorised

**High Priority Pest in Industry Biosecurity Plan(s):** Yes  No

– If yes, list relevant industry(s): <relevant industry(s)>

**CCEPP has considered this pest previously:** Yes  No

<CCEPP Secretariat to complete, if applicable>
